Mark Dennis Concha

Aspiring SOC Analyst (Tier 1) · BS Computer Science Student

Taguig City, Metro Manila, PH markdennisconcha14@gmail.com
linkedin.com/in/mark-dennis-concha-2ab10a316 github.com/deeihen markdennisconcha.vercel.app

SUMMARY

Computer science student at Taguig City University training for a tier 1 SOC role: log analysis, threat detection and incident response. Certified by Cisco and IBM SkillsBuild, and a backend contributor to RescueLink Taguig, an emergency platform in production for the Command Center of Taguig. Takes part in CTF events in web exploitation, forensics, cryptography and OSINT.

EDUCATION

BS Computer Science · Taguig City University, Taguig City — 2023 – 2027 (expected)

Senior High School, STEM-PTECH strand · Taguig City University, Taguig City — 2021 – 2023

CERTIFICATIONS

Introduction to Cybersecurity · Cisco — Aug 2026

Cybersecurity Fundamentals · IBM SkillsBuild — Aug 2026

Working in a Digital World: Professional Skills · IBM SkillsBuild — Aug 2026

PROJECTS

RescueLink Taguig · Backend Developer, Documentation — 2026
Team of 4 · rescuelinktaguig.com

- Emergency response platform in production for the Command Center of Taguig: residents request help by live voice, video or chat.
- Worked on the backend and wrote the project documentation; coordinators triage, log and dispatch Police, Fire, Medical and DRRMO from one real-time workspace.

Next.js · NestJS · Socket.IO · PostgreSQL · Prisma · Docker · AWS

Booklat · AppBuildersPH Hackathon 2026: Local AI — 2026
Team of 3

- Offline oral-reading assessment for Filipino teachers; on-device speech recognition suggests reading marks in English and Filipino, and learner audio never leaves the device.

.Js · Free JavaScript Course — 2026
Solo build · dotjsv2.vercel.app

- 21 short lessons for complete beginners that run and check code in the browser; no account, progress stays on the device.

Next.js · React · Three.js · GSAP

SKILLS

SOC	Log analysis (Splunk), threat detection (Sigma, MITRE ATT&CK), incident response (NIST SP 800-61), network traffic analysis, endpoint monitoring (Sysmon, Wazuh), vulnerability scanning
CTF	Web exploitation, forensics, cryptography, OSINT and recon
Security tools	Burp Suite, Nmap, Wireshark, CyberChef, Kali Linux, Parrot OS, Arch Linux
Programming	Python, Java, C#, MySQL, React, Next.js
AI tools	Claude Code, Codex, Antigravity, Devin
